

The Federal Communications Commission

Dear The Federal Communications Commission,

Dear FCC:I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!My telephone service both land line & prepaid wireless has way too many fees now. My Alltel bill includes 33%in fees and my prepaid wireless has 20%. Also this 911 is getting out of hand. According to the news paper,Erie,pa county has accumulated 3.5 million dollars and everybody is trying to spend it.This program also needs reviewed. I don't think your purpose with this fee was to be a cash cow for the counties. I'm sure there are probably others with the same situation.

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!
SINCERELY, Ronald J Neubert

Sincerely,

Ronald Neubert Sr
